

Derek Carttar

Senior Technical Writer and Editor

Dcarttar@gmail.com | 870-731-7035 | McCrory, AR (Remote) | Documentation sample: help.abcfitness.com/ignite

SUMMARY

Technical writer and editor with 14 years at a single fintech/fitness-tech SaaS company, working on API and product documentation across 8+ products, including club management software, mobile applications, and reporting systems. Worked across the full documentation stack — from structured content authoring in MadCap Flare, through Swagger/OpenAPI documentation and version-controlled publishing pipelines, to a tiered internal/external knowledge base. Covered a growing share of documentation work as the team shrank, collaborated closely with engineering and support teams, and adopted AI-assisted authoring tools into daily workflows.

EXPERIENCE

Senior Technical Editor | ABC Fitness Solutions, LLC (formerly ABC Financial Services)

May 2022 – August 2026 — Remote

- Promoted from Technical Writer III after a decade documenting API and product releases; continued covering the majority of documentation output as the Documentation Team shrank from three to two people.
- Documented API and product releases across 8+ products, working directly in development environments and coordinating closely with developers and QA testers to verify accuracy before publication.
- Maintained the company's primary help system in MadCap Flare, integrating and merging content contributions from other technical writers on the team.
- Authored and maintained Swagger/OpenAPI documentation for the company's API products.
- Created and enforced style guides and documentation templates for both the Documentation team and the API team.
- Helped build and maintain a tiered knowledge base for Technical Support and Training teams, maintaining separate internal, client-facing, and third-party vendor content versions to control access appropriately.
- Partnered closely with the Technical Support team to keep technical content accurate and current, ensuring Client Success Managers and support staff had timely access to needed information.
- Edited and quality-reviewed documentation produced by other technical writers prior to publication.
- Adopted AI-assisted tools (Cursor, Claude, ChatGPT, Atlassian Rovo) into documentation workflows and built automation for recurring documentation tasks.
- Documented and tested club management software, related mobile applications, and reporting systems, working directly with product and engineering teams to verify accuracy ahead of release.
- Built video tutorials and training content using Camtasia, Captivate, and Snagit to supplement written documentation.
- Used version control across MadCap Central, GitHub, and SVN to manage documentation source and publishing pipelines.

Technical Writer III | ABC Financial Services

August 2012 – May 2022 — Little Rock, Arkansas

- Built foundational experience with the company's documentation systems and processes over a decade, including the core MadCap Flare help project and early API documentation practices later expanded as Senior Technical Editor.
- Collaborated with subject matter experts and engineering stakeholders to translate complex technical systems into documentation for technical and non-technical audiences alike, including external clients.

Website Coordinator | Arkansas STEM Coalition

March 2012 – October 2012 — Little Rock Metropolitan Area

- Managed web content optimization and documentation for the organization's public-facing site.

TECHNICAL STACK

Content and Authoring Layer: MadCap Flare, Markdown, Adobe InDesign, structured single-sourcing, style guides and templates, knowledge base architecture

API and Documentation Layer: Swagger/OpenAPI, RESTful Web Services, Postman, 3scale, API documentation

Version Control and Publishing: MadCap Central, GitHub, SVN, version-controlled publishing pipelines

Collaboration and Project Tools: Jira, Atlassian Suite, Confluence, Zendesk, ServiceNow, Figma, Miro, Workday

AI-Assisted Workflows: Cursor, Claude, ChatGPT, Atlassian Rovo, workflow automation

Video and Visual Documentation: Camtasia, Adobe Captivate, Snagit

Cross-Functional Collaboration: Engineering and QA coordination, Technical Support partnership, SME interviewing, stakeholder communication, editing and QA review

EDUCATION

Bachelor of Arts, Professional, Technical, Business, and Scientific Writing

University of Arkansas at Little Rock — 2009–2012
